EXPERIENCE

UI DESIGNER AND FRONT-END DEVELOPER
Africa To Sillicon Valley (A2SV)
2023

I have been involved in a UI design and development project within A2SV, which aims to establish connections between African talents and leading tech companies. The project utilizes contemporary front-end technologies such as React, Next, and TailwindCSS to create user interfaces that are intuitive and engaging.

UI DESIGNER AND FRONT-END DEVELOPER
Rock Library - AASTU
2022 - 2023

Led UI design, development, and implementation for an informative website on Ethiopia's rocks and minerals, in collaboration with my university's mining department. Created site maps and mockups based on user feedback and proven methodologies, employing modern front-end technologies like Vue.js and TailwindCSS for intuitive and engaging user interfaces.

UI DESIGNER
Software Department - AASTU
2022

Led a 7-member design team in creating a website for our university's software engineering department. Used wireframes, mock-ups, and prototypes with Figma to establish the website's UI design and architecture.
